
3S PLUS Bolus

Composition: Each bolus contains Sulphadiazine BP 1.583 g, Sulphadimidine BP 1.583 g, Sulphapyridine BP 1.583g & Streptomycin Sulphate BP 0.313g (equivalent to streptomycin base 0.25g).

Description: 3S Plus is a combination of three powerful Sulphonamides and an antibiotic. It is highly effective against enteric & systemic pathogens.

Advantages:

- 3s Plus is effective in any type of infectious Diarrhoea
- 3s Plus is effective in Calf scour, coccidiosis in Calf
- 3s Plus is a combination of three powerful Sulphonamides and an antibiotic Streptomycin, so pathogens can not resist it

Indication: 3s Plus bolus is indicated for the treatment of systemic and enteric diseases caused by both gram positive and gram negative organisms and protozoa sensitive to sulphonamide and streptomycin.

Dosage and Administration: 3S Plus bolus is administered only by oral route. The daily requirement dose is one bolus for 35 kg body weight for 1st day and half of the initial dose for consecutive 3-5 days, but if necessary treatment may continue up to 7 days or as directed by the registered veterinarian.

Contraindication: It should not be used in animals hypersensitive to Sulfonamide & Streptomycin and it is also contraindicated in case of renal impairment.

Side effect: Comparatively it has no side effect at recommended dose. But prolonged treatment may cause agranulocytosis, haemolytic anemia & avitaminosis-K in the body.

Precaution: Close observation should be needed in case of prolonged treatment. Adequate drinking water should be given during treatment the animal in case of dehydration. Avoid contact with skin due to component Streptomycin.

Storage: Store in a cool & dry place, protect from light and keep out of reach of children.

Presentation: Each box containing 10 × 2 boli.

For Veterinary Use Only
