

LARVAKILL

Active Ingredient: Cyromazine 1%

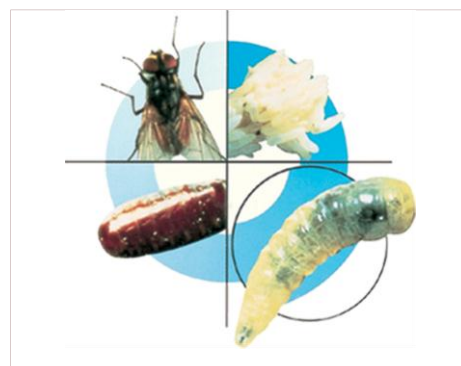

Indications: Flies in poultry farms cause stress to birds and humans alike, negatively impacting on egg & meat production. It carries germs and increases diseases risk.

Mode of Action: Larvae lives on organic phosphate in the poultry manure. Larvakill lacks their food and thus because of shortage of food larvae dies or can't convert into adult fly. Besides this Larvakill also attacks larvae's hormone stage and negatively effects its life cycle.

Dose Administration: Mix 0.05 % Larvaekill with poultry feed and use for 4-6 weeks. Give 2 weeks interval and reuse if flies number are again increased significantly.

Pack Size: 500 gm

Shelf Life: 18 months
