

ROMA

What is ROMA: It is a highly palatable single feed wax coated bait block used for the control of rodents. It is formulated using only the freshest and highest quality grains and cereal to ensure optimum palatability to rodents

Active Ingredient: Bromadiolone – 0.005%, a 2nd generation anticoagulant rodenticide.

Target Pests: *RattusNorvegicus*(Norway Rat), *RattusRattus* (Roof Rat), *MusMusculus*(House Mouse)

Benefits:

- Since rats die after 2-3 days of eating Roma other rats can't be aware of the medicine.
- Easy to use and no possibility of being mixed with feed ingredients
- It attracts rats
- Dies after 2-3 days far away
- Easy to handle
- Roma cake can be conveniently broken into 6 pieces.

ROMA is recommended for use in areas like residential premises, rubbish facilities, poultry farms, store rooms and in the fields.
